

Protecting your business like you protect your family.

24/7 protection and peace of mind

Removing the burden of IT from your business so you can focus on what you're passionate about.

Each day, thousands of businesses experience loss of data due to viruses, failed hardware, theft, fire, power outages and surges, and much more.

Gartner, the IT industry's leading source for research information estimates that 50 percent of businesses who experience a loss of data will file for bankruptcy or close within six months (2010).

Your business deserves to be protected just as you protect your family, health, and home.

Our antivirus, backup, and patch management services protect your business from these threats 24/7 and remove the burden of IT from you at the same time.

You'll never have to explain to your customers how or why you lost their data. You'll have confidence in your information systems as you work, and you'll sleep more soundly at night.

Antivirus, Backup, and Patch Management services are managed remotely, enabling you to focus on your business. Combined with ease-of-scale, no commitment, and hassle-free billing, our managed services keep your business' vital information protected and secured.

24/7 Antivirus Protection

More than 7,000 new viruses are released each day. With Allevia's "No Worries" Antivirus protection plan, never wonder again whether your business is protected.

24/7 Backup Protection

Loosing data isn't a question of "if" but "when". 50 percent of businesses that loose a significant amount of data due to hardware failure, theft, fire, etc. will file for bankruptcy or close within six months. Work hard and rest well knowing we've got you covered.

Patch Management

Receive the latest and most up-to-date updates from Microsoft without interrupting your work or your day. Have the peace of mind knowing your system is being updated from the cloud continuously to ensure protection and performance.

As Simple as 1,2,3!

- 1 Service - \$10/month
- 2 Services - \$20/month
- 3 Services - \$30/month

Our Services are easily priced at \$10 per computer, per month.

Antivirus support requires Patch Management support to be effective.

If purchasing Antivirus protection, you will also receive Patch Management support at a flat rate of \$20 per machine, per month for both services.

Backup services are encrypted and stored with bank-grade encryption! Pricing starts at \$10 for the service plus a low, per-gig rate of \$0.50!
